

CONTENTS

1. INTRODUCTION	1
2. MOISTURE SUSCEPTIBILITY OF ASPHALT MIXTURES	1
2.1 Introduction	1
2.2 Materials	1
2.3 Test Methods	3
2.4 Water Susceptibility of Asphalt Mixtures	3
2.5 Effect of Additives on Moisture Susceptibility	5
2.6 Summary	7
3. EFFECTS OF VARIOUS FACTORS ON ASPHALT CONCRETE PERFORMANCE	7
3.1 Introduction	7
3.2 Materials and Mixture Design	8
3.3 Test Methods	9
3.4 Effect of Modified Asphalt	9
3.5 Influence of Aggregate Grading	9
3.6 Influence of Compaction Effort	11
3.7 Summary	12
4. EVALUATION OF ASPHALT PAVEMENT GROOVE DURABILITY	12
4.1 Introduction	12
4.2 Materials and Mixture Design	12
4.3 Sample Preparation and Test Method	13
4.4 Test Results and Discussion	14
4.5 Summary	16
5. SIMPLE TEST FOR EVALUATION OF ASPHALT MIXTURE RESISTANCE TO LOW-TEMPERATURE CRACKING	16
5.1 Introduction	16
5.2 Material Properties	16
5.3 Experimental Procedure	17
5.4 Results and Analysis	18
5.5 Regression of Fracture Temperature against Other Indicators	19
5.6 Summary	21
6. EVALUATION INDICATOR OF ASPHALT MIXTURE RUTTING SUSCEPTIBILITY	21
6.1 Introduction	21
6.2 Materials	22
6.3 Sample Preparation and Test Program	22
6.4 Results and Analysis	23
6.5 Summary	28
7. FINAL CONCLUSIONS	29
ACKNOWLEDGMENTS	29
